

Cosmo Japanese Face Lift

Lone Sorensen, Sorensensistem™

Japanese Cosmo Face Lifting is a non invasive Neuro-Sensorial procedure that is performed on the face. Combining Facial Reflexology and Esthetic through the stimulation of 21 Acupressure Points in the facial tissue. The Japanese Cosmo Face Lifting Technique dramatically restores tone and smoothness minimizing fine lines and wrinkles and imparts a fresh luminous radiance to the face.

In preparation for the muscle toning work of the Japanese Cosmo Face Lift, deep cleansing and detoxifying of the skin are performed utilizing naturally beneficial skincare products customized for the skin's condition. During a session the face is gently sculpted giving a renewed look by lifting the facial tissue through the stimulation of the Acupressure Points.

While stimulating the superior layer of the skin Japanese Cosmo Face Lift also deeply works the Meridians and Facial Nerves, activating zones related to the Central Nervous System to achieve a physical and emotional balance throughout the body.

Japanese Cosmo Face Lifting was developed by Lone Sorensen based on more than 25 years of studying and practicing the healing Arts of Reflexology and Facial Reflexology.
