International Training week 2008

The best training week until date.
Playa de Aro in April.

NEXT YEAR WE INVITE TO A NEW WONDERFULL TRAINING WEEK THE LAST WEEK IN APRIL 09 included workshop in Corean hand reflexology. Latest booking january 2008 Please book in time.

Kali Mur Clorido de potasio

FACIAL DIAGNOSIS OF CELL SALT DEFICIENCIES

KALI MUR - signs in the area of cheeks, eyelids.

Kali Phos Fosfato de potasio

KALI PHOS - sunken temples and cheeks, overall gray coloring, dull eyes.

International Training week 2008

Situated in the beach, near the French border, in a and green nature, we had the 4th experience in Europe of a Practical Course in in Facial Reflexology in Abril this year.

In this beautiful place called Playa de Aro, with a unique spring taste and a special energy, we enjoyed several days of practice, interchanging experiences and treatments between Denmark, Sweden, Holand, England, Japan, Dubai, Poland and Spain.

We will repeat the experience the last week of Abril in 2009.

1. 29 students from 7 countries enjoyend the week. THANK YOU TO ALL OF YOU
2. Last night dinner in Bangladesh style.
3. Everybody dancing.

FACIAL DIAGNOSIS OF CELL SALT DEFICIENCIES

A perfect tool for Facial Reflexology and Cosmofacial treatment.

Cell salts, also called tissue salts, is a fabulous resource that every therapist who wants to incorporate natural medicine in their practice should have.

The inorganic salts are workers, controlled and directed by Infinite Intelligence, which perform the ceaseless miracle of creation and formation.

Elastic fiber, the chief organic substance in rubber, is formed by a chemical union between cell salts with protein and oil. Therefore we will find salt dominant in the elastic fiber of the body, For example in the connective tissue.

A lack of salts will not only causes a relaxed conditions of muscular tissue; wrinkles, bags under the eyes, brown spots, acne, inflammations, eczema, changes in the texture and color and many other signs in the face, but also physical and emotional signs.

FACIAL DIAGNOSIS

Facial diagnosis for cell salt deficiencies was pioneered by Dr. Schuessler (1821-1898) and was verified and expanded by Dr. Hicketier (1891-1958). Various practitioners in Germany such as doctors, homeopaths, and pharmacists have done further work in this area, but very little has been written about cell salts.

I have used this method of diagnosis and treatment successfully since 1980, with very satisfied clients. The great thing is that you cannot make mistakes with cell salts, as they are nontoxic and safe to take regardless of age, physical condition (including pregnancy and nursing), or current medication regime.

The chemical composition of nearly every fluid and tissue in the human body has long been known, but until biochemistry was introduced, -no practical use had been made of this knowledge the treatment for symptoms and sign in the body ex. in the skin.

Biochemistry is the system of medicine which answers satisfactorily and fully the question: "What is disease?" It not only does this, but it gives a logical reason for every dose of cell salt prescribed and describes its action in the system.

Biochemistry is science, not experimentalism. There is no more mystery and miracle about natural laws.

The food and drink taken into the stomach and the air breathed into the lungs furnish all the material of which the body is composed. By the juices of the stomach, -pancreas and liver, the food is digested and the useful particles are taken by the villi of the small Intestine. These are carried by the blood to the various parts of the body where they are needed and where they are absorbed. The blood thus supplies the materials necessary for forming tissue and fluid in the body and for carrying forward every process.

An analysis of the blood shows it to contain organic and inorganic matter. The organic constituents are sugar, fat, and aluminous (protein) substances. The inorganic constituents are water and certain minerals, - Cell salts.

Not until recently were the inorganic cell salts understood and appreciated. Being little in quantity, they were thought to be lesser in importance. But now it is known that the cell salts are the vital portion of the body, the workers, the builders; that the water and organic substances are simply inert matter used by these salts in building the cells of the body.

Should a deficiency occur in one or more of these workers, of whom there are twelve, some abnormal condition arises. These abnormal conditions are known by the general term "disease," and as they manifest themselves in different ways and in different parts of the body- and very often in the skin, tissue and muscles.

Many disease which afflicts the human race is due to a lack of one or more of these inorganic workers. Pains, unpleasant sensation or signs in the skin, indicates a lack of some inorganic constituent of the blood.

This explanation help to understand, why it is important to use cell salts.

There are several way to take/use cell salts. A common way is to tap 2-4 pellets the cap and drop them into the mouth. This is called the dry method.

Another way, in case of chronic cases, a good way is to alter the potency using the cell salts in wet form; ¼ l of distilled water with 4 cell salts and consume it throughout the day.

In cases of Skin problems it is possible to use cell salts with great success. The best way is to use moisturizing cream applying the cream to the affected area every day, or using a face mask applying one or several times at week.

Using cell salt cream or mask, delivers the salt in a slower but longer lasting application.

FACIAL LOCATIONS THAT INDICATE CELL SALT DEFICIENCIES

The photo indicates the places to look for signs of cell salt deficiency. In the list that follows, next to each cell salt you will find the major facial location or locations where a deficiency of this salt can be observed.

INCAearth, MINERAL COLOR THERAPY

New Cosmofacial masks made by cell salts, natural minerales and colors, makes possibly to treath skin problems in a effective way.

Original receipts from the aboriginal from Andes mountain.
